- ELIMINATES POSTAGE COSTS
- MEETS CUSTOMER DEMAND FOR ELECTRONIC DELIVERY
- REDUCES PAPER CONSUMPTION

Going **GREEN** has never been easier!

CFS Inc. recognizes the growing trend of electronic statements and “green banking initiatives” and has developed a simple solution for financial institutions. With *eStatements*, financial institutions will be able to provide their customers with browser based access to their electronic statements and images, removing the need to print, stuff and mail paper statements. *eStatements* will drastically reduce the cost associated with providing statements to your customers while giving them complete access to all their images via the internet.

The Process

Process and Archive – Processes images and data of items from various forms of input, verifies account number, checks for duplicate items and organizes this information for easy research. Once completed, item images are transmitted to the *eWizard* server.

eStatement Processing - Uses the statement print spool file from the CORE to locate, assemble and reconcile im-

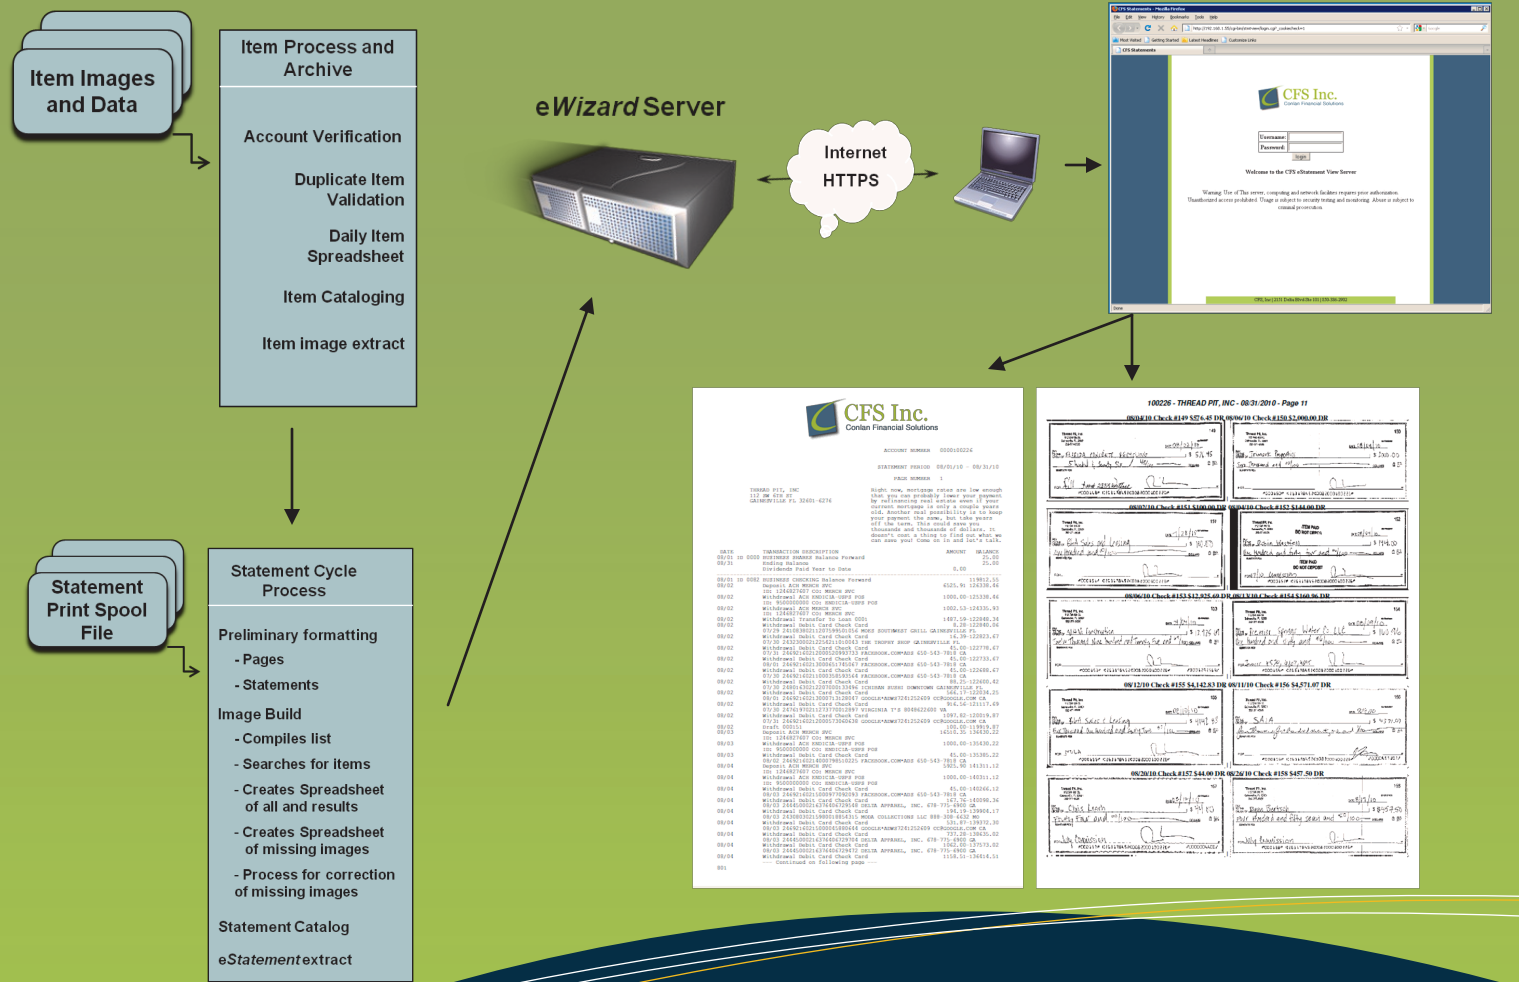

ages of items for transmission to the *eWizard* server.

Research - Provides the ability to research items, notices and statements. Account information is at the fingertips of the customer service reps, tellers, and the loan officers or any employee. These users are then able to research all account statements (text and images), customer checks since the last statement and customer notices. It also enables the viewing of a detailed snapshot of each day’s items in a spreadsheet. The user can also search by various criteria such as date, account number, etc.

Statement Printing – Uses the statement print spool file from the CORE to locate, assemble and reconcile images of items for printing and mailing, with or without images.

Notice Printing (optional)- Uses the NSF print spool file from the CORE to locate, assemble and reconcile images of items for printing and mailing, paid or returned.

eWizard - A server-side software program that delivers the images of items and electronic statements to your internet banking site. Now customers can view and print images of their checks and statements with the simple click of a mouse.

Who is CFS Inc?

CFS, Inc. is a software company that specializes in delivering full service check imaging solutions to financial institutions. We have been a chosen and trusted partner to banks and credit unions for many years offering our clients over 100 years of combined experience in the industry. Located in Tallahassee, Florida, we currently have banks in 6 states that rely on the software and excellent support from our company. CFS Inc. provides solutions for financial institutions to include development of products, enhancements, and ongoing maintenance and support from a single company with a proven track record of success. Part of our ongoing success is the ability to partner with major financial software and hardware solution providers and others allowing for smooth integration and ease of use of our products alongside your current technologies. Our software and services can greatly improve the effectiveness of your financial institution, while lowering your operating costs.
